

Product Specification

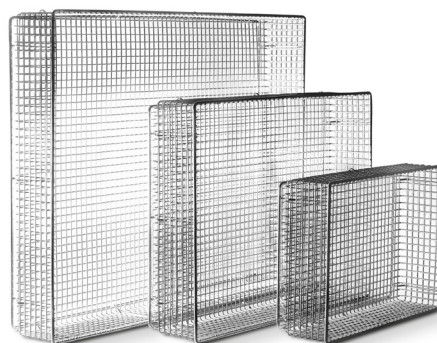

Getinge Instrument Tray SPRI

SPRI I, SPRI II, SPRI III

Accessory

The Instrument Tray SPRI is designed for instrument circulation within a Central Sterile Services Department (CSSD) and Theatre Sterile Supplies Unit (TSSU), as well as at sub-sterilization units.

The instrument trays are intended for use through all phases of the instrument processing. The trays are stackable, easy to clean and disinfect in a washer-disinfector. They are designed for fast self-drying. The trays are made of stainless steel electro-polished wire mesh with gaps of 6.5 mm (0.26"); large enough to allow the flow of air and water, yet small enough to prevent instrument damage.

The product range consists of three standard sizes, all adapted to fit inside modular wire baskets of the SPRI and other ISO standard baskets. Additionally, specialized instrument trays can be combined with a basic instrument tray set-up, covering all instruments used during any surgery. The trays are jig-welded to maintain size and shape even during heavy-duty work.

Key features

- Stackable
- Electrolytic polish for a smooth, clean surface
- Fulfills the hygiene demands of the health care sector and is autoclavable

Standards and codes

This product is classified as a Class I medical device and complies with the requirements in the applicable standards and directives.

Accessories for trays

Lids

The lids are designed as a wire net surrounded by a rigid wire frame. The lid is attached with hooks at the top of the tray, and locked down with a spring wire. There are three lid sizes, one fitting each tray.
